RE: Year 7 Health Development Review 2024/ 2025

We hope your child has settled into their high school. As your School Nursing Service we are here to support you, working within the guidance of the Healthy Child Programme: <https://www.gov.uk/government/collections/healthy-child-programme>

Following on from the initial health development review offered in reception, we would like to offer you and your child another opportunity to raise any health concerns within the **Health Development Review** offered to all Year 7 aged children. This is delivered in the form of a health questionnaire giving you the opportunity to provide information on all aspects of your child's health.

You will receive an e-questionnaire from **WCHC NHS** as a text on your mobile phone. **Please complete this with your child and submit the questionnaire without delay.**

If you DO NOT receive this questionnaire, please e-mail us at wchc.northscreeners@nhs.net providing us with your child's name, date of birth and most up-to-date mobile telephone number.

Once the completed questionnaire has been received, a member of the school nursing team will review the questionnaire and may contact you to support you with any concerns you have highlighted.

The information you share with us will be treated confidentially. For more information on the type of information that Wirral Community Health and Care NHS Foundation Trust holds; how that information is used; who we may share that information with; and how we keep it secure and confidential, please see the accompanying privacy notice. Our full privacy notice can be found on trust's website www.wirralct.nhs.uk

We have also attached a full list of all the vaccinations your child should have received prior to commencing school. If your child is not up to date with their preschool immunisations, please contact your GP as soon as possible to arrange an appointment.

Yours sincerely

School Nurse Screening Team
